

6 1/2" - PAPER CONE DRIVER - 170 mm

DOUBLE BOBBIN

CLASSIC SERIES

High loss-High compliance rubber surround
 Critically damped paper cone
 Double bobbin 2 x 8 Ω
 Stamped steel chassis
 High temperature voice coil (30 mm)
 Aluminium voice coil former
 Extended bass response (Fs : 45 Hz)

Suspension caoutchouc amortissant h^e compliance
 Cône papier traité amortissant
 Double bobine 2 x 8 Ω
 Chassis acier embouti
 Bobine haute température (30 mm)
 Support bobine aluminium
 Réponse étendue dans le grave (Fs : 45Hz)

This 6 1/2" woofer has been specifically designed to deliver excellent bass or sub-bass performance when used in a compact enclosure. The double bobbin voice coil (see "suggested applications") offers flexibility to tailor the bass response according to the user's requirements. Designed for high-end compact 2 way systems, this driver features a state of the art curvilinear paper cone, which is critically damped and coupled to a high loss rubber surround. Special consideration has been taken to ensure a smooth response, natural roll-off. A newly designed cosmetic ring helps to reduce edge diffraction. The high temperature, 1" voice coil, wound onto aluminium former, ensures excellent power handling. The "Suggested applications" charts indicate various driver loads, included the box alignment used to measure the response curve (Vb REF). The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

Ce haut-parleur de grave de 170 mm a été conçu pour une utilisation en grave ou sous-grave pour des enceintes compactes. La double bobine (voir "suggested applications") offre la possibilité d'adapter la réponse dans le grave en fonction des besoins. Il est destiné à des systèmes compacts haut de gamme 2 voies. Il est doté d'un cône en papier traité à profil curviligne associé à une suspension caoutchouc amortissant haute compliance. Un soin particulier a été apporté à cet ensemble afin d'assurer une réponse en fréquence linéaire ainsi qu'une coupure haute naturelle. Une nouvelle esthétique est également proposée par la présence d'une couronne décorative. La bobine haute température sur support aluminium autorise une puissance admissible importante. Le tableau "Suggested applications" indique différents types de charge dont celui utilisé pour la mesure de la courbe de réponse (Vb REF). Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Vp-Lp).
